TYPE PPLAB-100

TYPE PPLAB-200

TYPE PPLAB - 100 :

$$R = 3 D., H = 1.1 D., B = 0.6 D.$$

Crucibles in the type PPLAB-100 series are provided with an extra thick base to withstand heavy wear, have nominal capacity ranging from 10 ml to 200 ml and purity of 99.95%. All crucibles in this type range are exactly similar in shape and proportion, with dimensions confirming simple ratios.

The capacity, dimensions and weights of these crucibles and the corresponding lids shall be as follows :

REF. NO.	CAPACITY IN ML.	HEIGHT IN MM. (H)	TOP DIAMETER (D)	APPROXIMATE WEIGHT (GRAMS)		
				CRUCIBLE	CRUCIBLE WITH REINFORCED RIM	LID

TYPE PPLAB - 200 :

$$R = 3.1 D., H = 0.83 D., B = 0.61 D.$$

Designed for the use in furnace ignition applications, these types of crucibles are incorporated with broader diameter and the base for more stability than ordinary crucibles. All the crucibles in this type range are exactly similar in shape and properties, with dimensions confirming to simple ratios.

The capacity, dimensions and height of these crucibles and corresponding lids shall be as follows :

201	10	24.0	29.0	8	10	3.0
202	15	26.5	32.0	13	15	4.7
203	20	30.5	37.0	17	20	5.6
